"THE BLUE LINE" in the 21st century is the European manufacturer with the most comprehensive selection of hardware for commercial fishing.

"THE BLUE LINE" products are now in use by all the leading fishing nations throughout the world.

The production and storage facilities in Denmark consist of more than 11,000 m².

The production is equipped with modern, flexible CNC machinery, including a number of modern robots enabling us to comply with the latest standards of quality and precision.

"THE BLUE LINE" production is constantly checked by our quality assurance department.

"THE BLUE LINE" is always ready to meet the demand for new products and/or alterations of standard products.
